

## Deltamarin continues good cooperation with MV WERFTEN

Deltamarin and MV WERFTEN have signed a contract of design services for the second Global Class mega cruise ship. While the design project of the first Global Class vessel is still ongoing, Deltamarin now continues the good cooperation with the yard by providing services for the second vessel. The new contract covers large parts of basic and detail design as well as site assistance services for the vessel and it is worth about €16.5M.

*"We are very proud to continue the strategic partnership with MV WERFTEN. This project proves that Deltamarin's contribution to Global 1 and expertise in complex cruise ship engineering projects is highly valued by the client. We look forward to further developing the cooperation with MV WERFTEN, providing them with excellent services and helping them execute Genting's extensive newbuild programme. This project will further strengthen Deltamarin's long-term workload and has a positive effect on our employment,"* says Janne Uotila, Managing Director at Deltamarin.

The delivery of the ship to the owner is scheduled in 2022. Deltamarin's work is estimated to last for about three years.

The Global 2 cruise ship will be of the same size as the first vessel now under construction at the yard. It will be over 342 metres long, 46 metres wide and have a gross register tonnage of 204,000. The ships are designed specifically for the Asian market and can carry up to 9,500 passengers.
